**Subject:** FW: CTWS Boil Water Notice 10/2019

Background on BWN at Warm Springs.

They just sent in two rounds of sampling after repair work completed. Ricardi and I are reviewing now. Looks good. Likely I will send email in the next hour confirming EPA agrees with WS decision to lift BWN.

**Subject:** CTWS Boil Water Notice 10/2019

Good Morning,

This email will serve as the summary for the Pressure Reducing Valve work of phase 2 project for Confederated Tribes of Warm Springs.

On the week of 10/21/2019 the Confederated Tribes has hired Barry Buchanan and associates as project manager for the replacement of (2) PRV stations which are the South East station and the Kah-Nee-Tah Resort. Gelco Construction was the contractor doing the physical installation of said equipment.

Gelco had to also finish phase 1 of George Street prv station at the same time due to a parts delay issue and is now installed and operational.

The work for South East started late afternoon on 10/23/2019 and the contractor had a delay in parts which has caused some difficulties in keeping the water tanks filled.

The Tribes has made a decision to issue a boil water notice as a precautionary measure due to the unknown time frame for the parts to be delivered to the jobsite located in Warm Springs Agency area.

I had called Ricardi Duvil on 10/24/2019 at 8:00 am and then did a follow up call with Adom Baron to ensure that EPA was notified in a timely manner.

On 10/24/2019 the Tribal employees and contractor had worked an extremely long day to ensure that the tribes water system south of Shitike Creek will be able to replenish the water tanks in a timely manner.

The Water/Wastewater department had worked on flushing the water system and also had made adjustment to valving different areas to compensate for the pressure loss in the west hills area.

On 10/29/2019 The first round of Bac T samples was taken following the Warm Springs Water Quality Monitor Program after consulting with Adom Baron from EPA. This first round of samples (10) taken has resulted in All samples coming back negative for presence of E.Coli.

On 10/30/2019 the second round of BacT samples was taken (10) and ALL the results have come back negative for presence of E.Coil.

Thanks,

**Chico Holliday**
